Do I have to activate any TOA application for testing?

Thomas Staiger - 2026-05-11 - General Information

If you just want to try one of our applications you can use them with full functionality even without activating. The only limitations you will see without activation is a ToolsOnAir watermark every 9 seconds for the duration of one second when testing just:play/live, or a watermarked frame every 200th frame testing just:in

Once you buy our software you will get a unique activation code which removes the watermark.
