Do I have to activate any TOA application for testing?

Thomas Staiger - 2026-05-11 - [General Information](#)

If you just want to try one of our applications you can use them with full functionality even without activating. The only limitations you will see without activation is a ToolsOnAir watermark every 9 seconds for the duration of one second when testing just:play/live, or a watermarked frame every 200th frame testing just:in

Once you buy our software you will get a unique activation code which removes the watermark.
