How can I use the AVID (Euphonic) MC Transport together with just:live??

Georg - 2021-07-22 - in [Knowledgebase just:live/play](#)

Is it possible to use the AVID (Euphonic) MC Transport together with just:live v2.8 and lower and if yes how?

Yes it is possible. For an easy setup we offer a config XML which brings all the default settings to the MC Transport device. For further information please consult the "Control" chapter in our just:live user manual. Attached you can find the XML.
