macOS High Sierra currently not compatible with some devices from Sonnet

2018-01-09 - Georg - in [General](#)

Dear customer.

We ask all our customers using solutions from Sonnet to check the compatability of their hardware BEFORE upgrading to macOS High Sierra. Some devices are not compatible and Sonnet is working with Apple to get updated drivers to make them work again. Please check the compatibility here: [Sonnet](#)

Thank you

The Tools On Air support team
