Meltdown Security Vulnerability Fix

2018-01-19 - Mattia - in [General](#)

To all our customers who own a just:store, just:store mini and/or just:in linux, we are currently rolling out a fix for the current CPU Meltdown bug.

Please submit a ticket to support.toolsonair.com for further instructions.

Requirements are an internet connection to the machine and about 30 minutes of downtimes.

Please be advised that this fix/update will result in roughly 10% loss of performance at this moment in time.
